Experience:

- Lifelong programmer
- Excellent logic
- Multiple classes on programming, including:
 - Java
 - JavaScript
 - Html
 - CSS
- Other skills include:
 - Good leadership
 - Driven
 - Quick learner
 - Eye of an artist, fingers of a typist
- Awarded Eagle Scout
- Accepted into the Order of the Arrow as an Ordeal member
- (insert coding boot camp's official title)

Technical skills:

- Java
- JavaScript
- Html
- CSS
- jQuery
- Bootstrap
- Materialize

Projects

In-Browser Day Planner

- Daily activities can be entered in and saved at all hours of the day. The current hour is highlighted to show how close the next upcoming task is to the current time, as well as an always updating time display in the header.
- Languages used:
 - JavaScript
 - CSS
 - jQuery

In-Browser Weather App

- Different cities can be searched to have the current days weather and a five-day forecast displayed. Once a city is searched, a button will be created to recall the cities weather if another is searched.
- Languages used:
 - JavaScript
 - CSS
 - jQuery

Meal and Drink Recipe Search Engine for Restaurants

- I wrote the code which displays the results of the query. This search engine will display the results of two different searches, one for meal recipes and the other for drink recipes, in a mobile friendly manner for use by cooks and bartenders to make recipes they don't know on the fly.
- Languages used:
 - JavaScript
 - CSS
 - jQuery

Education:

- Rice University Coding Boot Camp (Certificate)
